

INTERNAL MEDICINE-PEDIATRICS

Credit: All

Location: Women's and Children's Hospital

Revised: 2/26/2009

Applications will be accepted beginning February 1st of Year III on a first-come, first-serve basis

PREREQUISITES: Medicine I & Pediatrics Clerkships

DURATION: 4 weeks

DATES OFFERED: All Year

Rotations are scheduled: By calendar month

NUMBER OF STUDENTS: 1

VISITING STUDENTS: Yes

COURSE OBJECTIVES:

Students will be able to:

1. Demonstrate proficiency in documenting a relevant history and physical for adult and pediatric patients seen in ambulatory clinics.
2. Demonstrate comprehension of current strategies for patient management in various specialties of Medicine and Pediatrics as evidenced through case discussions and chart reviews in clinics as assigned.

SUPERVISION:

80% Faculty

20% Fellows

DESCRIPTION:

Students will participate in a combined Internal Medicine and Pediatrics (Med+Peds) Outpatient Rotation in which they will have the opportunity to go to both the adult and pediatric version of the same subspecialty clinic within the same week often within the same day. This is a unique opportunity to compare and contrast the practice of the same subspecialty within pediatric and adult medicine. They will also experience specific Med+Peds experiences such as Adult Cystic Fibrosis Clinic, Adult Congenital Heart Disease Clinic, and the Med+Peds Continuity Clinic where they will see and address issues specific to Med+Peds like Transitional Care.

EVALUATION:

Students will be informed of expectations and methods of evaluation during orientation at beginning of rotation. Student's performance is assessed by supervising attending or fellow based on their participation in clinical activities (50%), attendance in all assigned clinics/rounds (25%), and their final presentation (25%). Ongoing feedback will be given after each patient encounter.
