

PULMONARY DISEASE

Credit: All

Location: LAC + USC Medical Center

Revised: 2/25/2009

Applications will be accepted beginning February 1st of Year III on a first-come, first-serve basis

PREREQUISITE: Medicine I Clerkship

DURATION: 4 weeks

DATES OFFERED: All Year

Rotations scheduled: to begin any Monday

NUMBER OF STUDENTS: 1

VISITING STUDENTS: Yes

COURSE OBJECTIVES:

Students will be able to:

1. Skillfully perform the following procedures: arterial puncture, thoracentesis, spirometry, skin tests, cardiac resuscitation, and intubation.
2. Describe how to request and arrange for necessary investigative procedures, e.g., bronchoscopy, lung scan, angiogram, liver and scalene node biopsies and thoracotomy. Once scheduled, students will witness and assist in performing the procedures.
3. Discuss the diagnosis and management plan for patients with chronic obstructive pulmonary disease.
4. Discuss the diagnosis and detection and management of pulmonary tuberculosis.

DESCRIPTION:

The pulmonary clerkship will provide advanced clinical experience in pulmonary disease and offer the student an opportunity for active participation at the internship level in the delivery of care to sick inpatients as well as outpatients. In addition, the student will consolidate his/her knowledge in the basic sciences pertaining to respiratory disease. The student will attend and actively participate in clinical conferences (Tuesday and Thursday) and Journal Club (Wednesday).

EVALUATION:

Students will be evaluated on the basis of their day-to-day progress. Weekly feedback from the residents and the attending staff will help the faculty member responsible for the students to explore deficiencies in the early stage of the clerkship. He/she will then assign extra reading exercises for the deficient students. No formal examinations are planned.
